- English - A2 (in progress)

WORK EXPERIENCE

FRONT-END DEVELOPER

React / React Native | November 2022 - PRESENT

Developed react and react native applications using TS and cross-platform approach:

- I participated in the development of a learning platform for an online school.

I have implemented features in an authentication and authorization system, implemented a notification system, worked on components of lessons, profiles, checking assignments, and other, integrated a platform for conducting online classes.

stack: react, RTK, react hook form, axios, mui, styledcomponents.

- I participated in the development of a cross-platform application for reminders and blood pressure measurement app.

I have implemented features in navigation, set up a notification system, integrated graphs and diagrams using gesture-handler, worked on application localization, created animation, implemented authentication and session management.

stack: react native, async storage, styled-components, native modules (java, ruby, objective-c and c++), xcod.

Project Manager | 2018 - 2022

Team leadership and supervision. Implementing and optimizing business processes to enhance productivity and streamline operations within the organization. Communication with wholesale suppliers and buyers. Financial transactions. Successfully resolving critical issues and challenges.
